

ESTABLISH AN AMERICAN-DESIGNED PRODUCER RESPONSIBILITY SYSTEM

America's Plastic Makers® recognize the impact of plastic waste on the environment. That's why we support an American-designed producer responsibility system for consumer packaging that strengthens environmental protection and is dedicated to helping fund infrastructure development.

TO ACCELERATE A CIRCULAR ECONOMY FOR PLASTICS

\$17 BILLION

in investments are needed over the next 5 years to improve and modernize the recycling system.

THE RECYCLING PARTNERSHIP

Improve the recycling system overall by increasing access and modernizing the collection of all materials, including metals, paper, glass and plastic.

Provide funding to help improve recycling access, collection, sorting and outreach by investing all money collected through fees on consumer-packaged goods back into the system.

Consider and incentivize the use of packaging materials with better environmental performance.

Support innovation in recycling technologies via the private sector and public sector to ensure more used plastic is reused and not treated as waste.

Promote an American-designed competitive, free market approach to strengthen manufacturing supply chains for recycled plastics.
